Dear Sr. Pardinas,

A mutual friend, Cedric Belfrage, refers me to you. I had written to enlist his help. He is too preoccupied with what he describes as a very long and a very difficult book job. Cedric believes you may have the time and the interest. He adds that should you not, you might recommend someone who possibly might.

I have written and published four books on the Kennedy assassination and have three completely manuscripts as yet unpublished, including one dealing with both Kennedy assassinations and that of King, entitled COUP D'ETAT, which is descriptive.

There are a number of us who are continuing investigations. We cooperate informally among ourselves. We are least known or not known at all but are the only ones still working on the case(s).

One of my colleagues has some leads he would like followed down in Mexico, involving Oswald. It is for this I wrote Cedric.

My own belief is set forth in several of my works. It is that Oswald was anti-Communist, connected with the CIA and anti-castro activities, and was also framed in the JFK assassination as part of the propaganda designed to make it look like the assassination was from the left. Cedric has all of my published books. I am surprised that they have attracted no attention within Cuba, particularly OSWALD IN NEW ORLEANS: CASE FOR CONSPIRACY WITH THE CIA.

If you can possibly undertake to help us, on what would have to be a confidential basis, I would appreciate it very much. I think you would find you had done something worthwhile. In the event you find you cannot, could you please recommend someone you consider dependable?

Thank you very much for anything you can do.

Sincerely,

Harold Weisberg
